The Honorable Ernie Fletcher
Governor, Commonwealth of Kentucky
700 Capital Avenue
Suite 100
Frankfort, Kentucky 40601

Dear Governor Fletcher:

Members of this organization have been an integral part of the development of synfuels on a national scale for the past 30 years. We understand the strategic necessity for the development of this industry. EnviRes LLC is a Kentucky limited liability company that is commercializing a breakthrough gasification technology trademarked HyMelt®. Our process promises to be the "next generation" in gasification.

America faces a liquid fuels crisis. This product is in increasingly short supply and oil and derivative product prices have recently soared to record levels. If Kentucky has the courage to seize the moment and establish a leadership role on the energy front our state can realize great possibilities. For example:

- Kentucky has a substantial liquid fuels resource base of coal, biomass, and oil shale to substitute for conventional oil imports.
- Existing technologies are available today to harness these resources. These existing technologies will only drive research and expand our educational opportunities across the Commonwealth. This will serve to improve our ability to economically and responsibly develop these resources.
- Capital is available in unprecedented quantities for projects to form partnerships with private investors, states and the federal government.

Several companies including EnviRes are poised to announce projects across the United States this year. It is imperative that we have a clear knowledge of the scope of incentives that will be offered by the Commonwealth. There appears to be broad support for energy legislation, therefore I believe there is justification for addressing the issue in a Special Legislative Session.

Thank you for your consideration.

Sincerely,

A handwritten signature in black ink that reads "William Renner". The signature is fluid and cursive, with the first name being particularly prominent.

William Renner, CFO
